PROFESSIONAL SUMMARY

Software Developer delivering production support and web application improvements across React, PHP, JavaScript, and MySQL. Resolves L1-L3 technical tickets, debugs frontend, backend, and database issues, and improves system performance through SQL query optimization and API integration. Builds internal tools such as ticket management systems and supports security-focused workflow updates like digital certification.

TECHNICAL SKILLS

Languages/Tools: HTML, CSS, JavaScript, TypeScript, GitHub, Tailwind CSS, PHP, DBeaver

Libraries/Frameworks: ReactJS, GSAP, React Router, jQuery, NodeJS

Database: Firebase, MySQL, Postgresql, Redis

Deployment: Vercel, Railway

Design: Figma, Canva

EDUCATION

Bachelor of Computer Science (Intelligent Systems)

Universiti Pertahanan Nasional Malaysia (UPNM) | 2021 - 2024 | CGPA: 3.43

Foundation in Engineering and Technology

Universiti Pertahanan Nasional Malaysia (UPNM) | 2020 - 2021 | CGPA: 3.50

WORK EXPERIENCE

Software Developer

Datascience Sdn Bhd | Feb 2026 - Present

- Managed and resolved technical tickets (L1–L3) for Financial Management Systems used by Universiti Utara Malaysia, Tourism Malaysia, and Majlis Agama Islam dan Adat Istiadat Melayu Perlis (MAIPs)
- Debugged and resolved issues across frontend, backend, and database layers in production environments (PHP, Javascript, MYSQL, Dbeaver)
- Developed a Ticket Management System for company use with a frontend focus using React, JavaScript, Tailwind CSS, Axios, and React Query, integrated with REST APIs.
- Performed database investigation and SQL query optimization to improve system performance
- Implemented POS Digital Certification for approval workflows to enhance security and compliance
- Contributed to system improvements and change requests

IT Support Assistant (Protege)

SY Trisilco Sdn Bhd | Mar 2025 - Jan 2026

- IP patching and updating microwave links network configuration for YTL Communication (YES)
- Upgraded existing microwave links with installing fiber
- Installed and configured single IDU IP10 Ceragon for new fiber sites
- Maintained Excel macros and contributed to internal automation systems
- Assisted with microwave backhaul and decommissioned old links

PROJECTS

Ulvser — Multi-Style UI Landing Page

(React, Vite, Tailwind CSS, CSS)

- Developed a responsive landing page with modular React components featuring real-time switching across 9 UI design styles (Glassmorphism, Brutalism, Neomorphism, and more)
- Architected a CSS data-attribute theming system with fully scoped style-sheets per design style, enabling zero-JS visual transformation across all components.
- Managed global theme state using React Context API with smooth CSS transitions applied consistently site-wide.

GitHub: <https://github.com/Trixy98/UI-styles-landing>

Live Demo: <https://ulvser-livid.vercel.app/>

Resitku — Receipt OCR Expense Tracker

(Typescript, React, NodeJS, Express, Prisma, Postgresql, Docker, Terraform, AWS)

- Built a receipt-first expense app: upload a photo, parse vendor/amount/date with OCR, then confirm it as a categorised MYR transaction.
- Deployed on AWS with Terraform: ALB, ECS Fargate (API + worker), private RDS Postgres, S3, SQS, and Textract.
- Packaged API and OCR worker in one Docker image; used a local OCR stub (MinIO/ElasticMQ) so AWS is only needed in production.

GitHub: <https://github.com/Trixy98/Resitku>

TaskFlow

(React, Node.js, Tailwind CSS, Express, MySQL)

- Built a full-stack task management application using React, Vite, Node.js, Express, and MySQL.
- Developed core productivity features including task CRUD, priority management, due-date tracking, Kanban board, calendar view, and advanced search.
- Implemented collaboration modules such as team invitations, project grouping, feedback threads, notifications, and file attachments.

GitHub: <https://github.com/Trixy98/TaskFlow-API>

Live Demo: <https://taskflow-api-production-66fc.up.railway.app>

ResumAI – AI-Powered Resume Analyzer

(React, TypeScript, React Router, Tailwind CSS, Claude AI API, Puter.js, Zustand)

- Built a full-stack web app for resume analysis with secure auth and session-based login.
- Implemented AI scoring for ATS, content quality, skills, and job-description match.
- Added resume versioning with score comparison across iterations.
- Built Resume Rewrite Assistant for ATS-friendly section rewrites.

GitHub: <https://github.com/Trixy98/AI-resumeAnalyzer>

Live Demo: <https://ai-resumeanalyzer-production-195b.up.railway.app/>

ACTIVITIES & LEADERSHIP

- Exco, UPNM Mobile Game Tournament (2020)
- Volunteer, Misi Bantuan Banjir UPNM KL (2021)
- Participant, MOHE-MDEC Global Outsourcing Talent Bootcamp (2024)
- Participant, Town Hall Keselamatan Negara 2.0: Ancaman Jenayah Siber (2023)
- Volunteer, Gotong-Royong @ SK Cheras Jaya (2023)
- Demonstrator, Robotics Program @ SMK Seri Mulia (2023)
- Demonstrator, SULAM Program @ SK Bandar Tun Razak 1 (2023)

LANGUAGES

- English (Fluent)
- Malay (Native)
- Mandarin (Basic)
